

TOPICS IN HEAVY ION COLLISIONS

A conference on the physics of hot and dense strongly interacting matter

TOPICS TO BE DISCUSSED WILL INCLUDE:

- Flow phenomena in nuclear collisions
- Phase transitions in nuclear matter
- Properties of nuclear systems with high isospin
- Particle abundance and spectra
- Fluctuations, low-momentum correlations
- Penetrating probes
- Heavy flavour production, high P_T phenomena

McGill

**McGILL UNIVERSITY,
MONTREAL, CANADA
JUNE 25-28, 2003**

ORGANISING COMMITTEE:

S. Das Gupta (McGill)
J. Barrette (McGill)
L. Beaulieu (Laval)
C. Gale (McGill)
S. Jeon (McGill)
R. Roy (Laval)
M. B. Tsang (NSCL, MSU)

INTERNATIONAL ADVISORY COMMITTEE

J.-P. Blaizot (Saclay)
M. Colonna (INFN)
P. Danielewicz (NSCL, MSU)
C. K. Gelbke (NSCL, MSU)
H. Gutbrod (GSI)
J. Harris (Yale)
B. Jacak (Stony Brook)
B. K. Jennings (TRIUMF)
J. Kapusta (Minnesota)
L. McLerran (BNL)
B. Müller (Duke)
J. Natowitz (Texas A & M)
E. Shuryak (Stony Brook)
B. Sinha (Saha, VECC)
J. Stachel (Heidelberg)
B. Tamain (LPC, Caen)
W. Trautmann (GSI)
I. Tserruya (Weizmann)
V. Viola (Indiana)
X.-N. Wang (LBNL)
